

Desktop: How to Join A Session

Q: Where do I go to “join” my session?

A: To access a session so that you can “join” it, you must be invited via an email invitation or have a session link. Whichever way you were invited, once you log in or click the session link, you will see two methods for joining: **Join Using Browser** or **Join Using VL App**.

1. **Join Using Browser:** Allows for a quick entry into the session without downloading extra software to your computer. If you are not going to share your desktop/application or use the “Insert Screenshot” tool on the Whiteboard, this is the recommended method.
2. **Join Using VL App:** Allows for entry into the session using the Virtual Learning App. This does require a one-time download of Adobe® Air® and the Virtual Learning App.

Why Use the Virtual Learning App?

- Conveniently runs in the background while it manages popup windows and notifications in a user-friendly manner.
- More responsive and performs faster.
- MAC users are **NOT** limited by browser, OS/X and JAVA compatibility issues to share their desktop or application share.

Note: *You will need an internet connection and the latest version of Adobe Flash® Platform and Adobe® AIR® if using the VL App. For more info on these products, go to www.adobe.com and choose downloads.*
